

Clinipace Worldwide

Guiding life sciences through clinical development and regulatory challenges

Clinipace Worldwide is a global full-service clinical research organization that serves the unique needs of emerging and mid-size biopharma.

We are dedicated to helping clients advance positive outcomes for both stakeholders and patients. Building strong relationships with clients, sites and regulatory authorities is imperative, and we do so based on a collaborative, proactive and transparent approach.

Clinipace leverages extensive therapeutic knowledge and clinical trial expertise to optimize clinical development timelines, execute regulatory strategies and deliver high quality trials.

From offices in Asia Pacific, North and South America and Europe, over 800 people on our fast-growing team have completed more than 3000 complex clinical trials and regulatory and statistical consulting projects.
